

## **US Benchmark Series ETF Wins ETF.com Award**

### **US Treasury Three Month Bill ETF (TBIL) wins Best New ETF**

Boston, Mass.; May 3, 2023 – F/m Investments (“F/m”) happily announces its US Treasury Three Month Bill ETF (TBIL) has won the ETF.com Award for Best New ETF. TBIL is one of ten ETFs in F/m’s popular US Benchmark Series, a family of ETFs designed to simplify access to the US Treasury market. Each ETF holds the most current (on the run<sup>i</sup>) US Treasury security that corresponds to its stated maturity. F/m is a wholly owned RIA subsidiary of Diffractive Managers Group.

“We are thrilled the public recognizes the value and importance of the US Benchmark Series since its launch in August,” said Alexander Morris, F/m’s CIO. “For TBIL to be recognized in this manner shows the great work that The US Benchmark Series team has done to bring such an efficient and high-quality suite of products to the market.”

Investors have been seeking an easy way to invest in the attractive yields offered today by US Treasuries securities. To meet this need, F/m launched TBIL and the rest of the US Benchmark Series – an innovative suite of ETFs that gives investors easy, low-cost, tax efficient access to US Treasuries at ten distinct points along the yield curve. Each ETF in the US Benchmark Series holds the current “on-the-run” Treasury security of its stated maturity. The investment objective of the US Treasury Three Month Bill ETF is to seek investment results that correspond (before fees and expenses) generally to the price and yield performance of the ICE BofA US 3-Month Treasury Bill Index. ---

*<sup>i</sup> This periodic transition to the most-recently auctioned Treasury bill, note, or bond of a stated maturity, which is referred to as the “on-the-run” or “OTR” security of that maturity, occurs on one day. An OTR security is the most recently issued of a periodically issued security (as opposed to an off-the-run security, which is a security that has been issued before the most recent issue and is still outstanding).*

### **About Diffractive Managers Group**

Diffractive is a private multi-boutique asset management company with centralized distribution and operational support whose affiliates manage more than \$24 Billion in total AUM. Diffractive’s expertise lies in identifying unique and innovative investment strategies and uncovering partnership opportunities where centralized distribution can drive significant growth. Read the prospectus or summary prospectus carefully before investing.***

*As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Interest rate risk is the risk of losses attributable to changes in interest rates. In general, if prevailing interest rates rise, the values of debt instruments tend to fall, and if interest rates fall, the values of debt instruments tend to rise.*

***Fund Risks:*** *The UST 3 Month Bill Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the UST 3 Month Bill Fund's investments more than the market as a whole, to the extent that the UST 3 Month Bill Fund's investments are concentrated in a particular issue, issuer or issuers, country, market segment, or asset class. While U.S. Treasury obligations are backed by the "full faith and credit" of the U.S. Government, such securities are nonetheless subject to credit risk (i.e., the risk that the U.S. Government may be, or be perceived to be, unable or unwilling to honor its financial obligations, such as making payments).*

***ICE BofA US 3-Month Treasury Bill Index*** *is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date.*

*Investments involve risk. Principal loss is possible.*
