Statement of Additional Information

Dated August 6, 2022

US Treasury 30 Year Bond ETF (“UST 30 Year”), US Treasury 20 Year Bond ETF (“UST 20 Year”), US Treasury 10 Year Note ETF (“UST 10 Year”), US Treasury 7 Year Note ETF (“UST 7 Year”), US Treasury 5 Year Note ETF (“UST 5 Year”), US Treasury 3 Year Note ETF (“UST 3 Year”), US Treasury 2 Year Note ETF (“UST 2 Year”), US Treasury 12 Month Bill ETF (“UST 12 Month”), US Treasury 6 Month Bill ETF (“UST 6 Month”), and US Treasury 3 Month Bill ETF (“UST 3 Month”) (each a “Fund” and together the “Funds”) are diversified series of The RBB Fund, Inc. (the “Company”), an open-end management investment company organized as a Maryland corporation on February 29, 1988.

F/m Investments, LLC d/b/a North Slope Capital, LLC serves as the investment adviser to each Fund.

Information about the Fund is set forth in the prospectus dated August 6, 2022 (the “Prospectus”) and provides the basic information you should know before investing. To obtain a copy of the Prospectus and/or the Fund’s Annual and Semi-Annual Reports (when available), please write to the Fund c/o U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, WI 53202 or call 800-617-0004. This Statement of Additional Information (“SAI”) is not a prospectus but contains information in addition to and more detailed than that set forth in the Prospectus. It is incorporated by reference in its entirety into the Prospectus. This SAI is intended to provide you with additional information regarding the activities and operations of the Funds and the Company, and it should be read in conjunction with the Prospectus.

FUND HISTORY

The Company is an open-end management investment company currently consisting of 50 separate portfolios. The Company is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and was organized as a Maryland corporation on February 29, 1988. This SAI pertains to shares of the US Treasury 30 Year Bond ETF, US Treasury 20 Year Bond ETF, US Treasury 10 Year Note ETF, US Treasury 7 Year Note ETF, US Treasury 5 Year Note ETF, US Treasury 3 Year Note ETF, US Treasury 2 Year Note ETF, US Treasury 12 Month Bill ETF, US Treasury 6 Month Bill ETF, US Treasury 3 Month Bill ETF. F/m Investments, LLC d/b/a North Slope Capital, LLC (the "Adviser") serves as the investment adviser to each Fund.

The investment objective of each Fund is to seek investment results that correspond (before fees and expenses) generally to the price and yield performance of its corresponding benchmark index ("Underlying Index"):

Fund	Underlying Index
UST 30 Year	ICE BofA Current 30-Year US Treasury Index (GA30)
UST 20 Year	ICE BofA Current 20-Year US Treasury Index (GA20)
UST 10 Year	ICE BofA Current 10-Year US Treasury Index (GA10)
UST 7 Year	ICE BofA Current 7-Year US Treasury Index (GA07)
UST 5 Year	ICE BofA Current 5-Year US Treasury Index (GA05)
UST 3 Year	ICE BofA Current 3-Year US Treasury Index (GA03)
UST 2 Year	ICE BofA Current 2-Year US Treasury Index (GA02)
UST 12 Month	ICE BofA US 1-Year Treasury Bill Index (G003)
UST 6 Month	ICE BofA US 6-Month Treasury Bill Index (G002)
UST 3 Month	ICE BofA US 3-Month Treasury Bill Index (G001)

Each Fund offers and issues shares at its net asset value per share ("NAV") only in aggregations of a specified number of shares (each a "Creation Unit"). Each Fund also generally offers and issues shares in exchange for a basket of securities ("Deposit Securities") together with the deposit of a specified cash payment ("Cash Component"). The Company reserves the right to permit or require the substitution of a "cash in lieu" amount ("Deposit Cash") to be added to the Cash Component to replace any Deposit Security. The shares of the Funds are listed on the Nasdaq (the "Exchange") and trade on the Exchange at market prices. These prices may differ from a Fund's NAV. The shares are also redeemable only in Creation Unit aggregations, and generally in exchange for portfolio securities and a specified cash payment. Creation Units generally consist of 10,000 shares, though this may change from time to time.

Shares of a Fund may be issued in advance of receipt of Deposit Securities subject to various conditions including a requirement to maintain on deposit with the Company cash at least equal to a specified percentage of the market value of the missing Deposit Securities as set forth in the Participant Agreement (as defined below). The Company may impose a transaction fee for each creation or redemption (the "Transaction Fee"). In all cases, such fees will be limited in accordance with the requirements of the Securities and Exchange Commission (the "SEC") applicable to management investment companies offering redeemable securities. The Funds may charge, either in lieu or in addition to the fixed creation or redemption Transaction Fee, a variable fee for creations and redemptions in order to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades resulting from such transaction, up to a maximum of 2.00% of the NAV per Creation Unit, inclusive of any Transaction Fees charged (if applicable).

INVESTMENT POLICIES AND PRACTICES

The Funds' investment objectives and principal investment strategies are described in the Prospectus. The sections below describe some of the different types of investments that may be made by the Funds as part of its non-principal investment strategy. The following information supplements, and should be read in conjunction with, the Prospectus.

With respect to the Funds' investments, unless otherwise noted, if a percentage limitation on investment is adhered to at the time of investment or contract, a subsequent increase or decrease as a result of market movement or redemption will not result in a violation of such investment limitation.

During unusual economic or market conditions, or for temporary defensive or liquidity purposes, any of the Funds may invest up to 100% of its assets in money market instruments that would not ordinarily be consistent with that Fund's objective.

There can be no guarantee that the Funds will achieve their investment objectives. The Funds may not necessarily invest in all of the instruments or use all of the investment techniques permitted by the Funds' Prospectus and this SAI, or invest in such instruments or engage in such techniques to the full extent permitted by the Funds' investment policies and limitations

Cash Equivalents and Short-Term Investments

The Funds may invest in cash, cash equivalents, and a variety of short-term instruments in such proportions as warranted by prevailing market conditions and the Funds' principal investment strategies. The Funds may temporarily invest without limit in such instruments for liquidity purposes, or in an attempt to respond to adverse market, economic, political or other conditions. During such periods, a Fund may not be able to achieve its investment objective.

Short-term instruments include obligations of the U.S. government or its agencies or instrumentalities (see "U.S. Government Securities" below) and, without limitation, the following:

(1) *Certificates of Deposit.* The Funds may invest in certificates of deposit issued against funds deposited in a bank or savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. If such certificates of deposit are non-negotiable, they will be considered illiquid investments and be subject to the Fund's 15% restriction on investments in illiquid investments. Pursuant to the certificate of deposit, the issuer agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$250,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(2) *Bankers' Acceptances.* The Funds may invest in bankers' acceptances, which are short-term credit instruments used to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

(3) *Repurchase Agreements.* The Funds may invest in repurchase agreements which involve purchases of debt securities. In such an action, at the time the Fund purchases the security, it simultaneously agrees to resell and redeliver the security to the seller, who also simultaneously agrees to buy back the security at a fixed price and time. This assures a predetermined yield for the Fund during its holding period since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Funds to invest temporarily available cash. The Funds may enter into repurchase agreements only with respect to certain obligations. For the Funds, collateral may consist of any fixed income security which is an eligible investment for the Funds entering into the repurchase agreement. The Funds' custodian will hold the securities underlying any repurchase agreement, or the securities will be part of the Federal Reserve/Treasury Book Entry System. The market value of the collateral underlying the repurchase agreement will be determined on each business day. If at any time the market value of the collateral falls below the repurchase price under the repurchase agreement (including any accrued interest), the Funds will promptly receive additional collateral (so the total collateral is an amount at least equal to the repurchase price plus accrued interest). Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Funds is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Funds are entitled to sell the underlying collateral. If the value of the collateral declines after the agreement is entered into, however, and if the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Funds could incur a loss of both principal and interest. The portfolio managers monitor the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The portfolio managers do so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Funds. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Funds to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) *Bank Time Deposits.* The Funds may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest. There may be penalties for the early withdrawal of such time deposits, in which case the yields of these investments will be reduced.

(5) *Eurodollar and Yankee Instruments.* The Funds may invest in Eurodollar certificates of deposit issued by foreign branches of U.S. or foreign banks; Eurodollar time deposits, which are U.S. dollar-denominated deposits in foreign branches of U.S. or foreign banks; and Yankee certificates of deposit, which are U.S. dollar-denominated certificates of deposit issued by U.S. branches of foreign

banks and held in the United States. In each instance, the Fund may only invest in bank instruments issued by an institution which has capital, surplus and undivided profits of more than \$100 million or the deposits of which are insured by the Bank Insurance Fund or the Savings Association Insurance Fund.

(6) *Money Market Funds and Short-Term Debt Funds.* The Funds may invest in money market funds. The Funds will each bear their proportionate share of the money market fund's fees and expenses (see "Other Investment Companies" below). The Funds may hold securities of other mutual funds that invest primarily in debt obligations with remaining maturities of 13 months or less.

Illiquid Investments

Pursuant to Rule 22e-4 under the 1940 Act, a Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment as defined in Rule 22e-4 is an investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions within 7 calendar days or less without the sale or disposition significantly changing the market value of the investment. These investments may include restricted securities and repurchase agreements maturing in more than 7 days. Restricted securities are securities that may not be sold to the public without an effective registration statement under the Securities Act of 1933, as amended (the "1933 Act"), and thus may be sold only in privately negotiated transactions or pursuant to an exemption from registration. Subject to the adoption of guidelines by the Board of Directors of the Company ("Board"), certain restricted securities that may be sold to institutional investors pursuant to Rule 144A under the 1933 Act and non-exempt commercial paper may be determined to be liquid by the Adviser. Illiquid investments involve the risk that the investments will not be able to be sold at the time the Adviser desires or at prices approximating the value at which a Fund is carrying the investments. To the extent an investment held by a Fund is deemed to be an illiquid investment or a less liquid investment, a Fund will be exposed to a greater liquidity risk.

The Company has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, other than by a change in market values, the condition will be reported to the Board and, when required by the Liquidity Rule, to the SEC.

Inflation Protected Securities

Each Fund may invest in inflation protected securities. Inflation protected securities are fixed income securities designed to provide protection against the negative effects of inflation. Two structures are common. The U.S. Treasury and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the inflation accruals as part of a semiannual coupon.

Inflation protected securities issued by the U.S. Treasury have maturities of five, ten, twenty or thirty years, although it is possible that securities with other maturities will be issued in the future. The U.S. Treasury securities pay interest on a semi-annual basis, equal to a fixed percentage of the inflation-adjusted principal amount. For example, if a Fund purchased an inflation protected bond with a par value of \$1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and inflation over the first six months was 1%, the mid-year par value of the bond would be \$1,010 and the first semi-annual interest payment would be \$15.15 (\$1,010 times 1.5%). If inflation during the second half of the year resulted in the whole years' inflation equaling 3%, the end-of-year par value of the bond would be \$1,030 and the second semi-annual interest payment would be \$15.45 (\$1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of U.S. Treasury inflation protected securities will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation protected bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed, and will fluctuate. Other inflation-protected securities that accrue inflation into their principal value may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation-protected securities is expected to change in response to changes in real interest rates. Real interest rates in turn are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation protected securities. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-protected securities.

The periodic adjustment of U.S. inflation protected bonds is tied to the Consumer Price Index for Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of

components such as housing, food, transportation and energy. Inflation protected securities issued by a foreign government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States. If the market perceives that the adjustment mechanism of an inflation-protected security does not accurately adjust for inflation, the value of the security could be adversely affected.

While inflation protected securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. The calculation of the inflation index ratio for inflation protected securities issued by the U.S. Treasury incorporates an approximate three-month lag, which may have an effect on the trading price of the securities, particularly during periods of significant, rapid changes in the inflation index. To the extent that inflation has increased during the three months prior to an interest payment, that interest payment will not be protected from the inflation increase. Further, to the extent that inflation has increased during the final three months of a security's maturity, the final value of the security will not be protected against that increase, which will negatively impact the value of the security. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in inflation-protected securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

Any increase in the principal amount of an inflation-protected security will be considered taxable income to the Fund, even though the Fund does not receive its principal until maturity.

Lending Portfolio Securities

A Fund may lend its portfolio securities to brokers, dealers, and financial institutions in an amount not exceeding 33 1/3% of the value of a Fund's total assets. These loans will be secured by collateral (consisting of cash, U.S. Government Securities, or irrevocable letters of credit) maintained in an amount equal to at least 100% of the market value, determined daily, of the loaned securities. A Fund may, subject to certain notice requirements, at any time call the loan and obtain the return of the securities loaned. A Fund will be entitled to payments equal to the interest and dividends on the loaned securities and may receive a premium for lending the securities. The advantage of such loans is that a Fund continues to receive the income on the loaned securities while earning interest on the cash amounts deposited as collateral, which will be invested in short-term investments.

A loan may be terminated by the borrower on one business day's notice, or by the Company on two business days' notice. If the borrower fails to deliver the loaned securities within four days after receipt of notice, the Company may use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost exceeding the collateral. As with any extensions of credit, there are risks of delay in recovery and, in some cases, even loss of rights in the collateral, should the borrower of the securities fail financially. In addition, securities lending involves a form of leverage, and a Fund may incur a loss if securities purchased with the collateral from securities loans decline in value or if the income earned does not cover a Fund's transaction costs. However, loans of securities will be made only to companies the Board deems to be creditworthy (such creditworthiness will be monitored on an ongoing basis) and when the income that can be earned from such loans justifies the attendant risks. Upon termination of the loan, the borrower is required to return the securities. Any gain or loss in the market price during the loan period would inure to the Fund.

When voting or consent rights that accompany loaned securities pass to the borrower, the Company will follow the policy of calling the loaned securities, to be delivered within one day after notice, to permit the exercise of such rights if the matters involved would have a material effect on the investment in such loaned securities. A Fund will pay reasonable finder's, administrative, and custodial fees in connection with loans of securities.

LIBOR Discontinuance or Unavailability Risk

Many financial instruments may be tied to the London Interbank Offered Rate, or "LIBOR," to determine payment obligations, financing terms, hedging strategies, or investment value. LIBOR is the offered rate for short-term Eurodollar deposits between major international banks. As of December 31, 2021, all non-U.S. dollar LIBOR publications have been phased out and a majority of U.S. dollar LIBOR settings will cease publication after June 30, 2023. It is possible that a subset of LIBOR settings will be published after these dates on a "synthetic" basis, but any such publications would be considered non-representative of the underlying market. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve's Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing SOFR that is intended to replace U.S. dollar LIBOR. Proposals for alternative reference rates for other currencies have also been announced or have already begun publication. Markets are slowly developing in response to these new reference rates. Uncertainty related to the liquidity impact of the change in rates, and how to appropriately adjust these rates at the time of transition, poses risks for the Fund. The effect of any changes to, or discontinuation of, LIBOR on the Fund will depend on, among other things, (1) existing fallback or termination provisions in individual contracts and (2)

whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new instruments and contracts. The expected discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, investment companies, and broker-dealers. The risks associated with this discontinuation and transition will be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. For example, current information technology systems may be unable to accommodate new instruments and rates with features that differ from LIBOR. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on the Fund until new reference rates and fallbacks for both legacy and new instruments and contracts are commercially accepted and market practices become settled.

Other Investment Companies

Each Fund may invest in other investment companies, including open-end funds, closed-end funds, unit investment trusts, and exchange-traded funds (“ETFs”) registered under the 1940 Act that invest primarily in Fund eligible investments. Under the 1940 Act, a Fund’s investment in such securities is generally limited to 3% of the total voting stock of any one investment company; 5% of such Fund’s total assets with respect to any one investment company; and 10% of such Fund’s total assets in the aggregate. A Fund’s investments in other investment companies may include money market mutual funds. Investments in money market funds are not subject to the percentage limitations set forth above.

Many ETFs, however, have obtained exemptive relief from the SEC to permit unaffiliated funds to invest in their shares beyond these statutory limits, subject to certain conditions and pursuant to contractual arrangements between the ETFs and the investing funds. A Fund may rely on these exemptive orders that permit a Fund to invest in these ETFs beyond the limits contained in the 1940 Act, subject to certain terms and conditions. Generally, these terms and conditions require the Board to approve policies and procedures relating to certain of a Fund’s investments in ETFs. These policies and procedures require, among other things, that (i) the Adviser conducts a Fund’s investment in ETFs without regard to any consideration received by the Fund or any of its affiliated persons and (ii) the Adviser certifies to the Board quarterly that it has not received any consideration in connection with an investment by a Fund in an ETF, or if it has, the amount and purpose of the consideration will be reported to the Board and an equivalent amount of advisory fees shall be waived by the Adviser.

The SEC recently adopted certain regulatory changes and took other actions related to the ability of an investment company to invest in the securities of another investment company. These changes include, among other things, the rescission of certain SEC exemptive orders permitting investments in excess of the statutory limits and the withdrawal of certain related SEC staff no-action letters, and the adoption of Rule 12d1-4 under the 1940 Act. Rule 12d1-4 permits a Fund to invest in other investment companies beyond the statutory limits, subject to certain conditions. Notable conditions include those relating to: (i) control and voting that prohibit an acquiring fund, its investment adviser and their respective affiliates from beneficially owning more than 25% of the outstanding voting securities of an unaffiliated acquired fund; (ii) certain required findings relating to complexity, fees and undue influence (among other things); (iii) fund of funds investment agreements; and (iv) general limitations on an acquired fund’s investments in other investment companies and private funds to no more than 10% of the acquired fund’s asset, except in certain circumstances.

ETFs in which a Fund may invest are a type of index fund bought and sold on a securities exchange. An ETF trades like common stock and represents a portfolio of securities designed to track a particular market index. ETFs can give exposure to all or a portion of the U.S. market, a foreign market, a region, a commodity, a currency, or to any other index that an ETF tracks. The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile and ETFs have management fees that increase their costs. An ETF may fail to accurately track the returns of the market segment or index that it is designed to track, and the price of an ETF’s shares may fluctuate. In addition, because they, unlike traditional mutual funds, are traded on an exchange, ETFs are subject to the following risks: (i) the performance of the ETF may not replicate the performance of the underlying index that it is designed to track; (ii) the market price of the ETF’s shares may trade at a premium or discount to the ETF’s NAV; (iii) an active trading market for an ETF may not develop or be maintained; and (iv) there is no assurance that the requirements of the exchange necessary to maintain the listing of the ETF will continue to be met or remain unchanged. Trading in an ETF may be halted if the trading in one or more of the ETF’s underlying securities is halted, which could result in the ETF being more volatile. In the event substantial market or other disruptions affecting ETFs should occur in the future, the liquidity and value of the Fund’s shares could also be substantially and adversely affected.

If a Fund invests in other investment companies, Fund shareholders will bear not only their proportionate share of the Fund’s expenses, but also, indirectly, the similar expenses of the underlying investment companies. Shareholders would also be exposed to the risks associated not only with the Fund, but also with the portfolio investments of the underlying investment companies. Shares of certain

closed-end funds may at times be acquired at market prices representing premiums to their NAVs. Shares acquired at a premium to their NAV may be more likely to subsequently decline in price, resulting in a loss to the Fund and its shareholders.

U.S. Government Securities

Each Fund may invest in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies and instrumentalities do not guarantee the market value of their securities, and consequently, the value of such securities may fluctuate.

U.S. Treasury obligations include separately traded interest and principal component parts of such obligations, known as Separately Traded Registered Interest and Principal Securities (“STRIPS”), which are transferable through the Federal book-entry system. STRIPS are sold as zero-coupon securities, which means that they are sold at a substantial discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. This discount is accreted over the life of the security, and such accretion will constitute the income earned on the security for both accounting and tax purposes. Because of these features, such securities may be subject to greater interest rate volatility than interest paying U.S. Treasury obligations.

When-Issued and Delayed Delivery Transactions

Each Fund may purchase securities on a when-issued or delayed delivery basis. When such a transaction is negotiated, the purchase price is fixed at the time the purchase commitment is entered, but delivery of and payment for the securities take place at a later date. A Fund will not accrue income with respect to securities purchased on a when-issued or delayed delivery basis prior to their stated delivery date.

The purchase of securities on a when-issued or delayed delivery basis exposes a Fund to risk because the securities may decrease in value prior to delivery. In addition, a Fund’s purchase of securities on a when-issued or delayed delivery basis while remaining substantially fully invested could increase the amount of a Fund’s total assets that are subject to market risk, resulting in increased sensitivity of NAV to changes in market prices. A seller’s failure to deliver securities to a Fund could prevent the Fund from realizing a price or yield considered to be advantageous.

When a Fund agrees to purchase securities on a when-issued or delayed delivery basis, a Fund will segregate cash or liquid securities in an amount sufficient to meet the Fund’s purchase commitments. It may be expected that a Fund’s net assets will fluctuate to a greater degree when it sets aside securities to cover such purchase commitments than when it sets aside cash. In addition, because a Fund will set aside cash or liquid securities to satisfy its purchase commitments, its liquidity and the ability of the Adviser to manage it might be affected in the event its commitments to purchase when-issued or delayed delivery securities ever became significant. Under normal market conditions, however, a Fund’s commitments to purchase when-issued or delayed delivery securities will not exceed 25% of the value of its total assets.

Zero-Coupon and Step Coupon Securities

Each Fund may invest in zero-coupon and step coupon securities. Zero-coupon securities pay no cash income to their holders until they mature. When held to maturity, their entire return comes from the difference between their purchase price and their maturity value. Step coupon securities are debt securities that may not pay interest for a specified period of time and then, after the initial period, may pay interest at a series of different rates. Both zero-coupon and step coupon securities are issued at substantial discounts from their value at maturity. Because interest on these securities is not paid on a current basis, the values of securities of this type are subject to greater fluctuations than are the value of securities that distribute income regularly and may be more speculative than such securities. Accordingly, the values of these securities may be highly volatile as interest rates rise or fall. In addition, while such securities generate income for purposes of generally accepted accounting standards, they do not generate cash flow and thus could cause a Fund to be forced to liquidate securities at an inopportune time in order to distribute cash, as required by the Code.

Temporary Investments

During periods of adverse market or economic conditions, a Fund may temporarily invest all or a substantial portion of its assets in high-quality, fixed-income securities, money market instruments, and shares of money market mutual funds, or it may hold cash. At such times, a Fund would not be pursuing its stated investment objective with its usual investment strategies. A Fund may also hold these investments for liquidity purposes. Fixed-income securities will be deemed to be of high quality if they are rated “A” or better by S&P or Moody’s or, if unrated, are determined to be of comparable quality by the Adviser. Money market instruments are high-quality, short-term fixed-income obligations (which generally have remaining maturities of one year or less) and may include U.S. Government Securities, commercial paper, certificates of deposit and banker’s acceptances issued by domestic branches of U.S. banks that are members of the Federal Deposit Insurance Corporation, and repurchase agreements for U.S. Government Securities. In lieu of purchasing money market instruments, the Fund may purchase shares of money market mutual funds that invest primarily in U.S. Government Securities and repurchase agreements involving those securities, subject to certain limitations imposed by the 1940 Act. A Fund, as an investor in a money market fund, will indirectly bear that fund’s fees and expenses, which will be in addition to the fees and expenses of the Fund. Repurchase agreements involve certain risks not associated with direct investments in debt securities.

Portfolio Turnover

Portfolio securities may be sold without regard to the time they have been held when investment considerations warrant such action. A higher portfolio turnover rate would result in higher brokerage costs to a Fund and could also result in the realization of larger amounts of capital gains, including short-term capital gains. Capital gains are generally taxable when distributed to shareholders, and distributions of short-term capital gains are generally taxable at ordinary income tax rates.

Pandemic Risk

Disease outbreaks that affect local economies or the global economy may materially and adversely impact a Fund and/or the Adviser’s business. For example, uncertainties regarding the novel Coronavirus (“COVID-19”) outbreak have resulted in serious economic disruptions across the globe. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions lead to instability in the market place, including stock market losses and overall volatility, as has occurred in connection with COVID-19. In the face of such instability, governments may take extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. The Adviser has in place business continuity plans reasonably designed to ensure that it maintains normal business operations, and it periodically tests those plans. However, in the event of a pandemic or an outbreak, there can be no assurance that the Adviser or a Fund’s service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. Although vaccines for COVID-19 are becoming more widely available, the full impacts of a pandemic or disease outbreaks are unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time.

Cyber Security Risk

A Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause a Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting a Fund, the Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact a Fund. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact a Fund’s ability to calculate its NAVs, cause the release of private shareholder information or confidential business information, impede trading, subject a Fund to regulatory fines or financial losses and/or cause reputational damage. A Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which a Fund may invest, which could result in material adverse consequences for such issuers and may cause a Fund’s investment in such companies to lose value. While each Fund and its service providers have established IT and data security programs and have in place business continuity plans and other systems designed to prevent losses and mitigate cyber security risk, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified or that cyber-attacks may be highly sophisticated. Furthermore, a Fund has limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to a Fund and the Adviser.

INVESTMENT RESTRICTIONS

The Company has adopted the following investment restrictions as fundamental policies with respect to each Fund. These restrictions cannot be changed with respect to each Fund without the approval of the holders of a majority of that Fund’s outstanding voting

securities. For the purposes of the 1940 Act, a “majority of outstanding shares” means the vote of the lesser of: (1) 67% or more of the voting securities of the Fund present at the meeting if the holders of more than 50% of the Fund’s outstanding voting securities are present or represented by proxy; or (2) more than 50% of the outstanding voting securities of the Fund.

Except with the approval of a majority of the outstanding voting securities, each Fund may not:

1. Concentrate its investments (*i.e.*, hold more than 25% of its total assets) in any industry or group of related industries. For purposes of this limitation, securities of the U.S. government (including its agencies and instrumentalities), repurchase agreements collateralized by U.S. government securities, and tax-exempt securities of state or municipal governments and their political subdivisions are not considered to be issued by members of any industry.
2. Borrow money or issue senior securities (as defined under the 1940 Act), except to the extent permitted under the 1940 Act.
3. Make loans, except to the extent permitted under the 1940 Act.
4. Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments, except to the extent permitted under the 1940 Act. This shall not prevent the Fund from investing in securities or other instruments backed by real estate, real estate investment trusts or securities of companies engaged in the real estate business.
5. Purchase or sell commodities or commodity contracts, except as permitted by the 1940 Act, as amended, and as interpreted or modified by the regulatory authority having jurisdiction from time to time
6. Underwrite securities issued by other persons, except to the extent permitted under the 1940 Act.
7. With respect to 75% of its total assets, purchase securities of an issuer (other than (i) securities issued by other investment companies, (ii) securities issued by the U.S. government, its agencies, instrumentalities or authorities, or (iii) repurchase agreements fully collateralized by U.S. government securities) if (a) such purchase would, at the time, cause more than 5% of the Fund’s total assets taken at market value to be invested in the securities of such issuer; or (b) such purchase would, at the time, result in more than 10% of the outstanding voting securities of such issuer being held by the Fund.

Group of related industries is defined as three or more industries based on the Adviser’s classification for the purpose of this section.

In addition to the foregoing fundamental investment policies, each Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Directors. Each Fund may not:

1. Acquire any illiquid investment if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money and illiquid investments will be observed continuously. If the percentage of the Fund’s net assets invested in illiquid investments exceeds 15% due to market activity or changes in the Fund’s portfolio, the Fund will take appropriate measures to reduce its holdings of illiquid investments as soon as reasonably practicable, in a manner consistent with prudent management and the interests of the Fund.

EXCHANGE LISTING AND TRADING

Shares are listed for trading and trade throughout the day on Nasdaq (the “Exchange”).

There can be no assurance that a Fund will continue to meet the requirements of the Exchange necessary to maintain the listing of shares. The Exchange will consider the suspension of trading in, and will initiate delisting proceedings of, the shares of a Fund under any of the following circumstances: (i) if any of the requirements set forth in the Exchange rules are not continuously maintained; (ii) if the Exchange files separate proposals under Section 19(b) of the 1940 Act and any of the statements regarding (a) the description of the Fund; (b) limitations on a Fund’s portfolio holdings or reference assets; (c) dissemination and availability of the intraday indicative values; or (d) the applicability of the Exchange listing rules specified in such proposals are not continuously maintained; (iii) if, following

the initial 12-month period beginning at the commencement of trading of a Fund, there are fewer than 50 beneficial owners of shares of the Fund; (iv) if the intraday indicative value is no longer disseminated at least every 15 seconds during the Exchange's regular market session and the interruption to the dissemination persists past the trading day in which it occurred; or (v) such other event shall occur or condition shall exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares from listing and trading upon termination of a Fund.

The Company reserves the right to adjust the price levels of its shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of a Fund.

As in the case of other stocks traded on the Exchange, broker's commissions on transactions will be based on negotiated commission rates at customary levels.

To provide additional information regarding the indicative value of shares, the Exchange or a market data vendor disseminates information every 15 seconds through the facilities of the Consolidated Tape Association, or other widely disseminated means, an updated "intraday indicative value" ("IIV") for the Fund as calculated by an information provider or market data vendor. The Company is not involved in or responsible for any aspect of the calculation or dissemination of the IIVs and makes no representation or warranty as to the accuracy of the IIVs.

MANAGEMENT OF THE COMPANY

The business and affairs of the Company are managed under the oversight of the Board, subject to the laws of the State of Maryland and the Company's Charter. The Directors are responsible for deciding matters of overall policy and overseeing the actions of the Company's service providers. The officers of the Company conduct and supervise the Company's daily business operations.

Directors who are not deemed to be "interested persons" of the Company (as defined in the 1940 Act) are referred to as "Independent Directors." Directors who are deemed to be "interested persons" of the Company are referred to as "Interested Directors." The Board is currently composed of seven Independent Directors and one Interested Director. The Board has selected Arnold M. Reichman, an Independent Director, to act as Chairman. Mr. Reichman's duties include presiding at meetings of the Board and interfacing with management to address significant issues that may arise between regularly scheduled Board and Committee meetings. In the performance of his duties, Mr. Reichman will consult with the other Independent Directors and the Company's officers and legal counsel, as appropriate. The Chairman may perform other functions as requested by the Board from time to time.

The Board meets as often as necessary to discharge its responsibilities. Currently, the Board conducts regular, in-person meetings at least four times a year, and holds special in-person or telephonic meetings as necessary to address specific issues that require attention prior to the next regularly scheduled meeting. The Board also relies on professionals, such as the Company's independent registered public accounting firms and legal counsel, to assist the Directors in performing their oversight responsibilities.

The Board has established seven standing committees — Audit, Contract, Executive, Nominating and Governance, Product Development, Regulatory Oversight, and Valuation Committees. The Board may establish other committees, or nominate one or more Directors to examine particular issues related to the Board's oversight responsibilities, from time to time. Each Committee meets periodically to perform its delegated oversight functions and reports its findings and recommendations to the Board. For more information on the Committees, see the section entitled "Standing Committees."

The Board has determined that the Company's leadership structure is appropriate because it allows the Board to effectively perform its oversight responsibilities.

Directors and Executive Officers

The Directors and executive officers of the Company, their ages, business addresses and principal occupations during the past five years are set forth in this section.

Name, Address, and Age	Position(s) Held with Company	Term of Office and Length of Time Served ¹	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Director*	Other Directorships Held by Director in the Past 5 Years
INDEPENDENT DIRECTORS

- * Each Director oversees 50 portfolios of the fund complex, consisting of the series in the Company and in The RBB Fund Trust (7 portfolios).
1. Subject to the Company's Retirement Policy, each Director may continue to serve as a Director until the last day of the calendar year in which the applicable Director attains age 75 or until his or her successor is elected and qualified or his or her death, resignation or removal. The Board reserves the right to waive the requirements of the Policy with respect to an individual Director. The Board has approved waivers of the policy with respect to Messrs. Brodsky, Giordano, Sablowsky and Straniere. Each officer holds office at the pleasure of the Board until the next special meeting of the Company or until his or her successor is duly elected and qualified, or until he or she dies, resigns or is removed.
 2. Mr. Sablowsky is considered an "interested person" of the Company as that term is defined in the 1940 Act and is referred to as an "Interested Director." Mr. Sablowsky is considered an "Interested Director" of the Company by virtue of his position as a senior officer of Oppenheimer & Co., Inc., a registered broker-dealer.

Director Experience, Qualifications, Attributes and/or Skills

The information above includes each Director's principal occupations during the last five years. Each Director possesses extensive additional experience, skills and attributes relevant to his qualifications to serve as a Director. The cumulative background of each Director led to the conclusion that each Director should serve as a Director of the Company. Mr. Brodsky has over 40 years of senior executive-level management experience in the cable television and communications industry. Mr. Chandler has demonstrated leadership and management abilities as evidenced by his senior executive level positions in the investment technology consulting/services and investment banking/brokerage industries, and also serves on various boards. Ms. Dolly has over three decades of experience in the financial services industry, and she has demonstrated her leadership and management abilities by serving in numerous senior executive-level positions. Mr. Giordano has years of experience as a consultant to financial services organizations and also serves on the boards of other registered investment companies. Mr. Reichman brings decades of investment management experience to the Board, in addition to senior executive-level management experience. Mr. Sablowsky has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the financial services industry. Mr. Shea has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the brokerage, clearing, and investment services industry, including service on the boards of industry regulatory organizations and a university. Mr. Straniere has been a practicing attorney for over 30 years and has served on the boards of an asset management company and another registered investment company.

Standing Committees

The responsibilities of each Committee of the Board and its members are described below.

Audit Committee. The Board has an Audit Committee comprised of three Independent Directors. The current members of the Audit Committee are Messrs. Brodsky, Chandler and Giordano. The Audit Committee, among other things, reviews results of the annual audit and approves the firm(s) to serve as independent auditors. The Audit Committee convened six times during the fiscal year ended August 31, 2021.

Contract Committee. The Board has a Contract Committee comprised of the Interested Director and four Independent Directors. The current members of the Contract Committee are Ms. Dolly and Messrs. Brodsky, Chandler, Sablowsky and Straniere. The Contract Committee reviews and makes recommendations to the Board regarding the approval and continuation of agreements and plans of the Company. The Contract Committee convened six times during the fiscal year ended August 31, 2021.

Executive Committee. The Board has an Executive Committee comprised of the Interested Director and three Independent Directors. The current members of the Executive Committee are Messrs. Chandler, Giordano, Reichman and Sablowsky. The Executive Committee may generally carry on and manage the business of the Company when the Board is not in session. The Executive Committee did not meet during the fiscal year ended August 31, 2021.

Nominating and Governance Committee. The Board has a Nominating and Governance Committee comprised of three Independent Directors. The current members of the Nominating and Governance Committee are Messrs. Brodsky, Giordano and Reichman. The

Nominating and Governance Committee recommends to the Board all persons to be nominated as Directors of the Company. The Nominating and Governance Committee will consider nominees recommended by shareholders. Recommendations should be submitted to the Committee care of the Company's Secretary. The Nominating and Governance Committee convened four times during the fiscal year ended August 31, 2021.

Product Development Committee. The Board has a Product Development Committee comprised of the Interested Director and three Independent Directors. The current members of the Product Development Committee are Messrs. Chandler, Reichman, Sablowsky and Shea. The Product Development Committee oversees the process regarding the addition of new investment advisers and investment products to the Company. The Product Development Committee convened three times during the fiscal year ended August 31, 2021.

Regulatory Oversight Committee. The Board has a Regulatory Oversight Committee comprised of the Interested Director and four Independent Directors. The current members of the Regulatory Oversight Committee are Ms. Dolly and Messrs. Sablowsky, Shea and Straniere. The Regulatory Oversight Committee monitors regulatory developments in the mutual fund industry and focuses on various regulatory aspects of the operation of the Company. The Regulatory Oversight Committee convened four times during the fiscal year ended August 31, 2021.

Valuation Committee. The Board has a Valuation Committee comprised of the Interested Director and two officers of the Company. The members of the Valuation Committee are Messrs. Faia, Sablowsky and Shaw. The Valuation Committee is responsible for reviewing fair value determinations. The Valuation Committee convened four times during the fiscal year ended August 31, 2021.

Risk Oversight

The Board performs its risk oversight function for the Company through a combination of (1) direct oversight by the Board as a whole and Board committees and (2) indirect oversight through the Company's investment advisers and other service providers, Company officers and the Company's Chief Compliance Officer ("CCO"). The Company is subject to a number of risks, including but not limited to investment risk, compliance risk, operational risk, reputational risk, credit risk and counterparty risk. Day-to-day risk management with respect to the Company is the responsibility of the Company's investment advisers or other service providers (depending on the nature of the risk) that carry out the Company's investment management and business affairs. Each of the investment advisers and the other service providers have their own independent interest in risk management and their policies and methods of risk management will depend on their functions and business models and may differ from the Company's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls.

The Board provides risk oversight by receiving and reviewing on a regular basis reports from the Company's investment advisers or other service providers, receiving and approving compliance policies and procedures, periodic meetings with the Company's portfolio managers to review investment policies, strategies and risks, and meeting regularly with the Company's CCO to discuss compliance reports, findings and issues. The Board also relies on the Company's investment advisers and other service providers, with respect to the day-to-day activities of the Company, to create and maintain procedures and controls to minimize risk and the likelihood of adverse effects on the Company's business and reputation.

Board oversight of risk management is also provided by various Board Committees. For example, the Audit Committee meets with the Company's independent registered public accounting firms to ensure that the Company's respective audit scopes include risk-based considerations as to the Company's financial position and operations. The Board may, at any time and in its discretion, change the manner in which it conducts risk oversight. The Board's oversight role does not make the Board a guarantor of the Company's investments or activities.

Director Ownership of Shares of the Company

The following table sets forth the dollar range of equity securities beneficially owned by each Director in the Funds and in all of the portfolios of the Company (which for each Director comprise all registered investment companies within the Company's family of investment companies overseen by him or her), as of December 31, 2021, including amounts through the deferred compensation plan.

Name of Director	Dollar Range of Equity Securities in the Funds*	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Director within the Family of Investment Companies
INDEPENDENT DIRECTORS		
Julian A. Brodsky	None	Over \$100,000
Gregory P. Chandler	None	Over \$100,000
Lisa A. Dolly ⁽¹⁾	None	None
Nicholas A. Giordano	None	\$10,001-\$50,000
Arnold M. Reichman	None	Over \$100,000
Brian T. Shea	None	\$10,001-\$50,000
Robert A. Straniere	None	\$10,001-\$50,000
INTERESTED DIRECTOR		
Robert Sablowsky	None	Over \$100,000

* The Funds had not commenced operations prior to the date of this SAI.

⁽¹⁾ Ms. Dolly began serving as a Director effective October 1, 2021.

Directors' and Officers' Compensation

Effective January 1, 2022, the Company and The RBB Fund Trust, based on an allocation formula, pay each Director a retainer at the rate of \$125,000 annually, \$13,500 for each regular meeting of the Board, \$3,500 for each committee meeting attended in-person, and \$2,000 for each committee meeting attended telephonically or special meeting of the Board attended in-person or telephonically. The Chairman of the Audit Committee and Chairman of the Regulatory Oversight Committee each receives an additional fee of \$20,000 for his services. The Chairman of the Contract Committee and the Chairman of the Nominating and Governance Committee each receives an additional fee of \$10,000 per year for his services. The Vice Chairman of the Board receives an additional fee of \$35,000 per year for his services in this capacity and the Chairman of the Board receives an additional fee of \$75,000 per year for his services in this capacity.

From April 1, 2019, through December 31, 2021, the Company paid each Director a retainer at the rate of \$125,000 annually, \$10,000 for each regular meeting of the Board, \$3,500 for each committee meeting attended in-person, and \$2,000 for each committee meeting attended telephonically or special meeting of the Board attended in-person or telephonically. The Chairman of the Audit Committee and Chairman of the Regulatory Oversight Committee each received an additional fee of \$20,000 for his services. The Chairman of the Contract Committee and the Chairman of the Nominating and Governance Committee each received an additional fee of \$10,000 per year for his services. The Vice Chairman of the Board received an additional fee of \$35,000 per year for his services in this capacity and the Chairman of the Board received an additional fee of \$75,000 per year for his services in this capacity.

Directors are reimbursed for any reasonable out-of-pocket expenses incurred in attending meetings of the Board or any committee thereof. An employee of Vigilant Compliance, LLC serves as President and CCO of the Company. Vigilant Compliance, LLC is compensated for the services provided to the Company, and such compensation is determined by the Board. For the fiscal year ended August 31, 2021, Vigilant Compliance LLC received \$690,000 in the aggregate from all series of the Company for its services. Employees of the Company serve as Treasurer, Secretary and Director of Marketing & Business Development, and are compensated for services provided. For the fiscal year ended August 31, 2021, each of the following members of the Board and the Treasurer, Secretary and Director of Marketing & Business Development received compensation from the Company in the following amounts:

Name of Director/Officer	Aggregate Compensation from the Funds*	Pension or Retirement Benefits Accrued as Part of Funds Expenses	Total Compensation From Fund Complex Paid to Directors or Officers
Independent Directors:			
Julian A. Brodsky, Director	\$0	N/A	\$198,000
J. Richard Carnall, Director ⁽¹⁾	\$0	N/A	\$190,000
Gregory P. Chandler, Director	\$0	N/A	\$224,500
Lisa A. Dolly, Director ⁽²⁾	\$0	N/A	\$0
Nicholas A. Giordano, Director	\$0	N/A	\$202,000
Arnold M. Reichman, Director and Chairman	\$0	N/A	\$275,500
Brian T. Shea, Director	\$0	N/A	\$191,875
Robert A. Straniere, Director	\$0	N/A	\$196,000
Interested Director:			
Robert Sablowsky, Director	\$0	N/A	\$258,000
Officers:			
James G. Shaw, Treasurer and Secretary	\$0	N/A	\$291,500
Craig Urciuoli, Director of Marketing & Business Development	\$0	N/A	\$254,400

*The Funds had not commenced operations prior to the date of this SAI.

⁽¹⁾ Mr. Carnall retired from his role as a Director effective October 1, 2021.

⁽²⁾ Ms. Dolly was appointed as a Director effective October 1, 2021.

Each compensated Director is entitled to participate in the Company's deferred compensation plan (the "DC Plan"). Under the DC Plan, a compensated Director may elect to defer all or a portion of his or her compensation and have the deferred compensation treated as if it had been invested by the Company in shares of one or more of the portfolios of the Company. The amount paid to the Directors under the DC Plan will be determined based upon the performance of such investments.

As of December 31, 2021, the Independent Directors and their respective family members (spouse or dependent children) did not own beneficially or of record any securities of the Company's investment advisers or distributor, or of any person directly or indirectly controlling, controlled by, or under common control with the investment advisers or distributor.

Director Emeritus Program

The Board has created a position of Director Emeritus, whereby an incumbent Director who has attained at least the age of 75 and completed a minimum of fifteen years of service as a Director, may, in the sole discretion of the Nominating and Governance Committee of the Company ("Committee"), be recommended to the full Board to serve as Director Emeritus.

A Director Emeritus that has been approved as such receives an annual fee in an amount equal to up to 50% of the annual base compensation paid to a Director. Compensation will be determined annually by the Committee and the Board with respect to each Director Emeritus. In addition, a Director Emeritus will be reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board meetings. A Director Emeritus will continue to receive relevant materials concerning the Funds, will be expected to attend at least one regularly scheduled quarterly meeting of the Board each year (which attendance may be via telephone), and will be available to consult with the Directors at reasonable times as requested. However, a Director Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Funds.

A Director Emeritus will be permitted to serve in such capacity from year to year at the pleasure of the Committee and the Board for up to three years. Effective October 1, 2021, J. Richard Carnall serves as a Director Emeritus of the Company.

CODE OF ETHICS

The Company, the Adviser, and Quasar Distributors, LLC (the “Distributor”), have each adopted a code of ethics (“Code of Ethics”) pursuant to Rule 17j-1 under the 1940 Act, which governs personal securities trading by their respective personnel. Each Code of Ethics permits such individuals to purchase and sell securities, including securities that are purchased, sold, or held by the Funds, but only subject to certain conditions designed to ensure that purchases and sales by such individuals do not adversely affect the Funds’ investment activities.

PRINCIPAL HOLDERS

As of the date of this SAI, no shares of the Funds were outstanding.

INVESTMENT ADVISORY AGREEMENT

Investment Advisory Agreement

The Adviser is a Delaware limited liability company with offices at 3050 K Street NW, Suite W-201, Washington, DC 20007. The Adviser is controlled by F/m Acceleration, LLC, a Delaware limited liability company, and EQSF Holdings, LLC, a Delaware limited liability company owned by three officers of the Company.

The Adviser provides investment advisory services to each Fund pursuant to the terms of an Investment Advisory Agreement (the “Advisory Agreement”) between the Company and the Adviser. After the initial two year-term, the Advisory Agreement may be continued in effect from year to year with the approval of (1) the Board or (2) vote of a majority (as defined by the 1940 Act) of the outstanding voting securities of each Fund, provided that in either event the continuance must also be approved by a majority of the Independent Directors by vote cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement terminates automatically in the event of its assignment, as defined in the 1940 Act and the rules thereunder.

The Adviser manages each Fund’s investments in accordance with the stated policies of the Fund, subject to the supervision of the Board. The Adviser provides such additional administrative services as the Company may require beyond those furnished by the Administrator and furnishes, at its own expense, such office space, facilities, equipment, clerical help, and other personnel and services as may reasonably be necessary in connection with the operations of the Company.

Pursuant to the terms of the Advisory Agreement, in consideration of the services provided by the Adviser, each Fund pays the Adviser a unitary management fee that is computed and paid monthly at an annual rate of 0.15% of the Fund’s average daily net assets during the month. From the unitary management fee, the Adviser pays most of the expenses of each Fund, including transfer agency, custody, fund administration, legal, audit and other services. However, under the Advisory Agreement, the Adviser is not responsible for interest expenses, brokerage commissions and other trading expenses, acquired fund fees and expenses, taxes and other extraordinary costs such as litigation and other expenses not incurred in the ordinary course of business. The Adviser will not be liable for any error of judgment, mistake of law, or for any loss suffered by a Fund in connection with the performance of the Advisory Agreement, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties, or from reckless disregard of its obligations and duties under the Advisory Agreement.

PORTFOLIO MANAGERS

Peter Baden and Alexander Morris are the portfolio managers responsible for investment-related services provided to the Fund. The following table provides information regarding accounts managed by each portfolio manager as of March 31, 2022.

Portfolio Manager; Other Accounts	Total Accounts		Accounts With Performance-Based Fees	
	Number	Assets	Number	Assets
Peter Baden				
Registered Investment Companies	0	0	0	0
Other Pooled Investment Vehicles	0	0	0	0
Other Accounts	862	\$560 million	0	0
Alexander Morris				
Registered Investment Companies	1	\$94 million	0	0
Other Pooled Investment Vehicles	0	0	0	0
Other Accounts	0	0	0	0

Portfolio Manager Compensation

The compensation structure for the portfolio managers is based upon a fixed salary as well as a discretionary bonus determined by the management of the Adviser. Salaries are determined by management and are based upon an individual's position and overall value to the firm. Bonuses are also determined by management and are based upon an individual's overall contribution to the success of the firm and the profitability of the firm. Salaries and bonuses are not based upon criteria such as performance of the Funds or the value of assets included in the Funds' portfolio.

Material Conflicts of Interest

The portfolio managers' management of other accounts may give rise to potential conflicts of interest in connection with their management of a Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as a Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby a portfolio manager could favor one account over another. Another potential conflict could include the portfolio managers' knowledge about the size, timing and possible market impact of Fund trades, whereby a portfolio manager could use this information to the advantage of other accounts and to the disadvantage of a Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities and other investments among all accounts it manages are fairly and equitably allocated. In accordance with the Adviser's trade rotation policy, there will be cases where a Fund will trade after other accounts.

Ownership of Fund Shares by the Portfolio Managers

The portfolio managers did not own any shares of the Funds as no shares of the Funds were outstanding prior to the date of this SAI.

UNDERWRITER

The Company has entered into a distribution agreement (the "Distribution Agreement") with Quasar Distributors, LLC (the "Distributor"), located at 111 East Kilbourn Avenue, Suite 2200, Milwaukee, Wisconsin 5320, pursuant to which the Distributor acts as each Fund's principal underwriter and distributes shares. Shares are continuously offered for sale by the Distributor only in Creation Units. Each Creation Unit is made up of at least 10,000 shares. The Distributor will not distribute shares in amounts less than a Creation Unit.

Under the Distribution Agreement, the Distributor, as agent for the Company, will receive orders for the purchase and redemption of Creation Units, provided that any subscriptions and orders will not be binding on the Company until accepted by the Company. The Distributor will deliver prospectuses and, upon request, Statements of Additional Information to persons purchasing Creation Units and will maintain records of orders placed with it. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934, as amended (the "Exchange Act") and a member of the Financial Industry Regulatory Authority.

The Distributor may also enter into agreements with securities dealers ("Soliciting Dealers") who will solicit purchases of Creation Units of shares. Such Soliciting Dealers may also be Authorized Participants (as discussed in "Procedures for Creation of Creation Units" below) or DTC participants (as defined below).

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board of Directors or by vote of a majority of a Fund's outstanding voting securities and, in either case, by a majority of the Independent Directors. The Distribution Agreement is terminable without penalty by the Company, on behalf of a Fund, on 60 days' written notice when authorized either by a majority vote of a Fund's shareholders or by vote of a majority of the Board of Directors, including a majority of the Directors who are not "interested persons" (as defined under the 1940 Act) of the Company, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment," as defined in the 1940 Act.

PURCHASE AND REDEMPTION OF CREATION UNITS

Purchase and Issuance of Creation Units

The Company issues and sells shares of a Fund only: (i) in Creation Units on a continuous basis through the Distributor, without a sales load (but subject to transaction fees), at their NAV next determined after receipt of an order, on any Business Day, in proper form pursuant to the terms of the Authorized Participant Agreement ("Participant Agreement"); or (ii) pursuant to the Dividend Reinvestment Service (defined below). The NAV of a Fund's shares is calculated each business day as of the close of regular trading on the Exchange, generally 4:00 p.m., Eastern Time. A Fund will not issue fractional Creation Units. A Business Day is any day on which the Exchange is open for business.

FUND DEPOSIT. The consideration for purchase of a Creation Unit of a Fund generally consists of the in-kind deposit of a designated portfolio of securities (the "Deposit Securities") per each Creation Unit, constituting a substantial replication of a Fund and a Cash Component (defined below), computed as described below. Notwithstanding the foregoing, the Company reserves the right to permit or require the substitution of a "cash in lieu" amount ("Deposit Cash") to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, a Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser. These additional costs associated with the acquisition of Deposit Securities ("Non-Standard Charges") may be recoverable from the purchaser of creation units.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the "Fund Deposit," which represents the minimum initial and subsequent investment amount for a Creation Unit of a Fund. The "Cash Component" is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the market value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (*i.e.*, the NAV per Creation Unit exceeds the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component will be such positive amount. If the Cash Component is a negative number (*i.e.*, the NAV per Creation Unit is less than the market value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the market value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which will be the sole responsibility of the Authorized Participant (as defined below).

Each Fund, through NSCC, makes available on each Business Day, immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for a Fund. Such Fund Deposit is subject to any applicable adjustments as described below, in order to effect purchases of Creation Units of a Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for a Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objectives of a Fund.

The Company reserves the right to permit or require the substitution of an amount of cash (*i.e.*, a "cash in lieu" amount) to replace any Deposit Security, which will be added to the Deposit Cash, if applicable, and the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant (as defined below) or the investor for which it is acting; (iv) would be restricted under the securities laws or where the

delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, “custom orders”).

CASH PURCHASE METHOD. The Company may at its discretion permit full or partial cash purchases of Creation Units of a Fund in instances permitted by the exemptive relief the Adviser is relying on in offering a Fund. When full or partial cash purchases of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind purchases thereof. In the case of a full or partial cash purchase, the Authorized Participant must pay the cash equivalent of the Deposit Securities it would otherwise be required to provide through an in-kind purchase, plus the same Cash Component required to be paid by an in-kind purchaser together with a Creation Transaction Fee and Non-Standard Charges, as may be applicable.

PROCEDURES FOR PURCHASE OF CREATION UNITS. To be eligible to place orders with the Distributor to purchase a Creation Unit of a Fund, an entity must be (i) a “Participating Party”, *i.e.*, a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the “Clearing Process”), a clearing agency that is registered with the SEC; or (ii) a DTC Participant. In addition, each Participating Party or DTC Participant (each, an “Authorized Participant” or “AP”) must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Transfer Agent” or “Fund Services”) and the Company, with respect to purchases and redemptions of Creation Units. Each AP will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Company an amount of cash sufficient to pay the Cash Component together with the Creation Transaction Fee (defined below) and any other applicable fees and taxes. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Company in connection with the purchase of a Creation Unit, which the Transaction Fee is designed to cover.

All orders to purchase shares directly from a Fund must be placed for one or more Creation Units in the manner set forth in the Participant Agreement (the “Cut-Off Time”). The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the “Order Placement Date.”

An AP may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase shares directly from a Fund in Creation Units have to be placed by the investor’s broker through an AP that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such APs may have international capabilities.

On days when the Exchange closes earlier than normal, a Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which a Fund’s investments are primarily traded is closed on any day, a Fund will not accept orders on such day. Orders must be transmitted by an AP by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Participant Agreement and in accordance with the AP Handbook. With respect to each Fund, the Distributor will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local subcustodian(s). Those placing orders through an AP should allow sufficient time to permit proper submission of the purchase order to the Distributor by the Cut-Off Time on the Business Day on which the order is placed. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Distributor or an AP.

Fund Deposits must be delivered by an AP through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a subcustody agent (for foreign securities) and/or through such other arrangements allowed by the Company or its agents. With respect to foreign Deposit Securities, the Custodian will cause the subcustodian of such Fund to maintain an account into which the AP will deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Company. Foreign Deposit Securities must be delivered to an account maintained at the applicable local subcustodian. The Fund Deposit transfer must be ordered by the AP in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of a Fund or its agents by no later than the Settlement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Company, whose determination will be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received in a timely manner by the Settlement Date, the creation order may be cancelled. Upon

written notice to the Distributor, such canceled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of a Fund.

The order will be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the Cut-Off Time and the federal funds in the appropriate amount are deposited by 2:00 p.m., Eastern time, with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m., Eastern time on the Settlement Date, then the order may be deemed to be rejected and the AP will be liable to a Fund for losses, if any, resulting therefrom. A creation request is considered to be in “proper form” if all procedures set forth in the Participant Agreement, AP Handbook and this SAI are properly followed.

ISSUANCE OF A CREATION UNIT. Except as provided herein, Creation Units will not be issued until the transfer of good title to the Company of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the subcustodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant subcustodian or subcustodians, the Distributor and the Adviser will be notified of such delivery, and the Company will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the third Business Day following the day on which the purchase order is deemed received by the Distributor. However, each Fund reserves the right to settle Creation Unit transactions on a basis other than the third Business Day following the day on which the purchase order is deemed received by the Distributor in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. The AP will be liable to a Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Company of all or a portion of the applicable Deposit Securities as described below. In these circumstances, the initial deposit will have a value greater than the NAV of the shares on the date the order is placed in proper form since in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the market value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the “Additional Cash Deposit”), which will be maintained in a separate non-interest bearing collateral account. An additional amount of cash will be required to be deposited with the Company, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Company in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily marked to market value of the missing Deposit Securities. The Participant Agreement will permit the Company to buy the missing Deposit Securities at any time. APs will be liable to the Company for the costs incurred by the Company in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the market value of such Deposit Securities on the day the purchase order was deemed received by the Distributor plus the brokerage and related transaction costs associated with such purchases. The Company will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Company and deposited into the Company. In addition, a Transaction Fee as set forth below under “Creation Transaction Fee” will be charged in all cases, unless otherwise advised by a Fund, and Non- Standard Charges may also apply. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

ACCEPTANCE OF ORDERS OF CREATION UNITS. The Company reserves the right to reject an order for Creation Units transmitted to it by the Distributor in respect of a Fund including, without limitation, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of a Fund; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; or (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Company, be unlawful.

CREATION TRANSACTION FEE. A purchase (*i.e.*, creation) transaction fee is imposed for the transfer and other transaction costs associated with the purchase of Creation Units, and investors will be required to pay a Creation Transaction Fee regardless of the number of Creation Units created in the transaction. A Fund may adjust the creation transaction fee from time to time based upon actual experience. In addition, a Fund may impose a Non-Standard Charge of up to 2% of the value of the creation transactions for cash creations, non- standard orders, or partial cash purchases for a Fund. A Fund may adjust the Non-Standard Charge from time to time based upon actual experience. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services, which may include an amount for the Creation Transaction Fee and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Deposit Securities to the account of the Company. The Adviser may retain all or a portion of the Transaction Fee to the extent the Adviser bears the expenses that otherwise would be borne by the Company in connection

with the purchase of a Creation Unit, which the Transaction Fee is designed to cover. The standard Creation Transaction Fee for a Fund is \$300.

RISKS OF PURCHASING CREATION UNITS. There are certain legal risks unique to investors purchasing Creation Units directly from a Fund. Because a Fund's shares may be issued on an ongoing basis, a "distribution" of shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from a Fund, breaks them down into the constituent shares, and sells those shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary-market demand for shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause a shareholder to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with a Fund's shares as part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3)(C) of the Securities Act.

Redemption of Creation Units

Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by a Fund through the Transfer Agent and only on a Business Day. EXCEPT UPON LIQUIDATION OF A FUND, THE COMPANY WILL NOT REDEEM SHARES IN AMOUNTS LESS THAN CREATION UNITS. Investors must accumulate enough shares in the secondary market to constitute a Creation Unit in order to have such shares redeemed by the Company. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a redeemable Creation Unit.

With respect to each Fund, the Custodian, through the NSCC, makes available immediately prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern time) on each Business Day, the list of the names and share quantities of a Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities. Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Company. With respect to in-kind redemptions of a Fund, redemption proceeds for a Creation Unit will consist of Fund Securities -- as announced by the Custodian on the Business Day of the request for redemption received in proper form -- plus cash in an amount equal to the difference between the NAV of the shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less any fixed redemption transaction fee as set forth below and any Non-Standard Charges. If the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the differential is required to be made by or through an AP by the redeeming shareholder. Notwithstanding the foregoing, at the Company's discretion, an AP may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

CASH REDEMPTION METHOD. Although the Company does not ordinarily permit full or partial cash redemptions of Creation Units of a Fund, when full or partial cash redemptions of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind redemptions thereof. In the case of full or partial cash redemptions, the AP will receive the cash equivalent of the Fund Securities it would otherwise receive through an in-kind redemption, plus the same Cash Amount to be paid to an in-kind redeemer. A Fund may incur costs such as brokerage costs or taxable gains or losses that a Fund might not have incurred if the redemption had been made in-kind. These costs may decrease a Fund's NAV to the extent that the costs are not offset by a transaction fee payable by an AP. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if a Fund had effected redemptions wholly on an in-kind basis.

REDEMPTION TRANSACTION FEES. A redemption transaction fee may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units, and APs will be required to pay a Redemption Transaction Fee regardless of the number of Creation Units created in the transaction. The redemption transaction fee is the same no matter how many Creation Units are being redeemed pursuant to any one redemption request. A Fund may adjust the redemption transaction fee from time to time based

upon actual experience. In addition, a Fund may impose a Non-Standard Charge of up to 2% of the value of a redemption transaction for cash redemptions, non-standard orders, or partial cash redemptions for a Fund. Investors who use the services of an AP, broker or other such intermediary may be charged a fee for such services which may include an amount for the Redemption Transaction Fees and Non-Standard Charges. Investors are responsible for the costs of transferring the securities constituting the Fund Securities to the account of the Company. The Non-Standard Charges are payable to a Fund as it incurs costs in connection with the redemption of Creation Units, the receipt of Fund Securities and the Cash Redemption Amount and other transactions costs. The standard Redemption Transaction Fee for a Fund is \$300.

PROCEDURES FOR REDEMPTION OF CREATION UNITS. Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to the time as set forth in the Participant Agreement. A redemption request is considered to be in “proper form” if (i) an AP has transferred or caused to be transferred to the Company’s Transfer Agent the Creation Unit(s) being redeemed through the book- entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Company is received by the Transfer Agent from the AP on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor’s shares through DTC’s facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request will be rejected.

The AP must transmit the request for redemption, in the form required by the Company, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor’s broker through an AP which has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such AP. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an AP and transfer of the shares to the Company’s Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not APs.

In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or AP acting on behalf of such Shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three business days of the trade date.

ADDITIONAL REDEMPTION PROCEDURES. In connection with taking delivery of shares of Fund Securities upon redemption of Creation Units, the AP must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within three Business Days of the trade date. However, due to the schedule of holidays in certain countries, the different treatment among foreign and U.S. markets of dividend record dates and dividend ex-dates (that is the last date the holder of a security can sell the security and still receive dividends payable on the security sold), and in certain other circumstances, the delivery of in-kind redemption proceeds may take longer than three Business Days after the day on which the redemption request is received in proper form. If neither the redeeming Shareholder nor the AP acting on behalf of such redeeming Shareholder has appropriate arrangements to take delivery of the Fund Securities in the applicable foreign jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of the Fund Securities in such jurisdiction, the Company may, in its discretion, exercise its option to redeem such shares in cash, and the redeeming shareholder will be required to receive its redemption proceeds in cash.

If it is not possible to make other such arrangements, or it is not possible to effect deliveries of the Fund Securities, the Company may in its discretion exercise its option to redeem such shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that a Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of shares of the relevant Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charge for requested cash redemptions specified above, to offset the Company’s brokerage and other transaction costs associated with the disposition of Fund Securities). A Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and a Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Company could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities

under such laws. An AP or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The AP may request the redeeming investor of the shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an AP that is not a “qualified institutional buyer,” (“QIB”) as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An AP may be required by the Company to provide a written confirmation with respect to QIB status in order to receive Fund Securities.

Because the portfolio securities of a Fund may trade on the relevant exchange(s) on days that the Exchange is closed or are otherwise not Business Days for such Fund, shareholders may not be able to redeem their shares of a Fund, or to purchase or sell shares of such Fund on the Exchange, on days when the NAV of such Fund could be significantly affected by events in the relevant foreign markets. The right of redemption may be suspended or the date of payment postponed with respect to each Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the shares of a Fund or determination of the NAV of the shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

PORTFOLIO HOLDINGS INFORMATION

The Company has adopted, on behalf of each Fund, a policy relating to the selective disclosure of a Fund’s portfolio holdings by the Adviser, Board, officers, or third party service providers, in accordance with regulations that seek to ensure that disclosure of information about portfolio holdings is in the best interest of the Fund’s shareholders. The policies relating to the disclosure of a Fund’s portfolio holdings are designed to allow disclosure of portfolio holdings information where necessary to a Fund’s operation without compromising the integrity or performance of a Fund. It is the policy of the Company that disclosure of a Fund’s portfolio holdings to a select person or persons prior to the release of such holdings to the public (“selective disclosure”) is prohibited, unless there are legitimate business purposes for selective disclosure.

The Company discloses portfolio holdings information as required in regulatory filings and shareholder reports, discloses portfolio holdings information as required by federal and state securities laws and may disclose portfolio holdings information in response to requests by governmental authorities. As required by the federal securities laws, including the 1940 Act, the Company will disclose a Fund’s portfolio holdings in applicable regulatory filings, including shareholder reports, reports on Form N-CSR, Form N-CEN, and Form N-PORT, or such other filings, reports or disclosure documents as the applicable regulatory authorities may require.

A Fund’s entire portfolio holdings are publicly disseminated each business day and may be available through financial reporting and news services including publicly available internet websites.

The Company may distribute or authorize the distribution of information about a Fund’s portfolio holdings that is not publicly available to its third-party service providers, which include U.S. Bank, N.A., the custodian; Fund Services, the administrator, accounting agent and transfer agent; Cohen & Company, Ltd., the Funds’ independent registered public accounting firm; Faegre Drinker Biddle & Reath LLP, legal counsel; FilePoint, the financial printer; the Funds’ proxy voting service(s); and the Company’s liquidity classification agent. These service providers are required to keep such information confidential, and are prohibited from trading based on the information or otherwise using the information except as necessary in providing services to a Fund. Such holdings are released on conditions of confidentiality, which include appropriate trading prohibitions. “Conditions of confidentiality” include confidentiality terms included in written agreements, implied by the nature of the relationship (e.g. attorney-client relationship), or required by fiduciary or regulatory principles (e.g., custody services provided by financial institutions). Portfolio holdings may also be provided earlier to shareholders and their agents who receive redemptions in kind that reflect a pro rata allocation of all securities held in a Fund’s portfolio.

Portfolio holdings may also be disclosed, upon authorization by a designated officer of the Adviser, to (i) certain independent reporting agencies recognized by the SEC as acceptable agencies for the reporting of industry statistical information and, (ii) financial consultants to assist them in determining the suitability of a Fund as an investment for their clients, in each case in accordance with the anti-fraud provisions of the federal securities laws and the Company’s and Adviser’s fiduciary duties to Fund shareholders. Disclosures to financial consultants are also subject to a confidentiality agreement and/or trading restrictions. The foregoing disclosures are made pursuant to the Company’s policy on selective disclosure of portfolio holdings. The Board or a committee thereof may, in limited circumstances, permit other selective disclosure of portfolio holdings subject to a confidentiality agreement and/or trading restrictions.

The Adviser reserves the right to refuse to fulfill any request for portfolio holdings information from a shareholder or non-shareholder if it believes that providing such information will be contrary to the best interests of a Fund.

The Board provides ongoing oversight of the Company's policies and procedures and compliance with such policies and procedures. As part of this oversight function, the Board receives from the CCO as necessary, reports on compliance with these policies and procedures. In addition, the Board receives an annual assessment of the adequacy and effectiveness of the policies and procedures with respect to a Fund, and any changes thereto, and an annual review of the operation of the policies and procedures. Any violation of the policy set forth above as well as any corrective action undertaken to address such violation must be reported by the Adviser, director, officer or third party service provider to the Company's CCO, who will determine whether the violation should be reported immediately to the Board or at its next quarterly Board meeting.

DETERMINATION OF NET ASSET VALUE

The following information supplements and should be read in conjunction with the sections in the Funds' Prospectus titled "HOW TO BUY AND SELL SHARES."

NAV is determined as of the close of regular trading on the NYSE (generally 4:00 p.m. Eastern time) each day the NYSE is open, except that no computation need be made on a day on which no orders to purchase or redeem shares have been received. The NYSE currently observes the following holidays: New Year's Day, Martin Luther King Jr. Day (third Monday in January), Presidents Day (third Monday in February), Good Friday (Friday before Easter), Memorial Day (last Monday in May), Juneteenth National Independence Day, Independence Day, Labor Day (first Monday in September), Thanksgiving Day (fourth Thursday in November), and Christmas Day.

NAV per share is computed by dividing the value of a Fund's net assets (*i.e.*, the value of its assets less its liabilities) by the total number of that Fund's shares outstanding. In computing NAV, securities are valued at market value as of the close of trading on each business day when the NYSE is open. Securities, other than stock options, listed on the NYSE or other exchanges are valued on the basis of the last reported sale price on the exchange on which they are primarily traded. However, if the last sale price on the NYSE is different from the last sale price on any other exchange, the NYSE price will be used. If there are no sales on that day, then the securities are valued at the bid price on the NYSE or other primary exchange for that day. Securities traded in the over-the-counter ("OTC") market are valued on the basis of the last sales price as reported by the National Association of Securities Dealers Automated Quotations ("NASDAQ"). If there are no sales on that day, then the securities are valued at the mean between the closing bid and asked prices as reported by NASDAQ. Stock options and stock index options traded on national securities exchanges or on NASDAQ are valued at the mean between the latest bid and asked prices for such options. Securities for which market quotations are not readily available and other assets are valued at fair value as determined pursuant to procedures adopted in good faith by the Board. Debt securities that mature in less than 60 days are valued at amortized cost (unless the Board determines that this method does not represent fair value), if their original maturity was 60 days or less or by amortizing the value as of the 61st day before maturity, if their original term to maturity exceeded 60 days. A pricing service may be used to determine the fair value of securities held by a Fund. Any such service might value the investments based on methods that include consideration of yields or prices of securities of comparable quality, coupon, maturity, and type; indications as to values from dealers; and general market conditions. The service may also employ electronic data-processing techniques, a matrix system, or both to determine valuation. The Board will review and monitor the methods such services use to assure itself that securities are valued at their fair values.

The values of securities held by a Fund and other assets used in computing NAV are determined as of the time at which trading in such securities is completed each day. That time, in the case of foreign securities, generally occurs at various times before the close of the NYSE. Trading in securities listed on foreign securities exchanges will be valued at the last sale or, if no sales are reported, at the bid price as of the close of the exchange, subject to possible adjustment as described in the Prospectus. Foreign currency exchange rates are also generally determined before the close of the NYSE. On occasion, the values of such securities and exchange rates may be affected by events occurring between the time as of which determinations of such values or exchange rates are made and the close of the NYSE. When such events materially affect the value of securities held by a Fund or its liabilities, such securities and liabilities will be valued at fair value in accordance with procedures adopted in good faith by the Board. The values of any assets and liabilities initially expressed in foreign currencies will be converted to U.S. dollars based on exchange rates supplied by a quotation service.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

The following information supplements and should be read in conjunction with the section in the Funds' Prospectus titled "DIVIDENDS, DISTRIBUTIONS, AND TAXES." In addition, the following is only a summary of certain U.S. federal income tax considerations that generally affect a Fund and its shareholders. No attempt is made to present a comprehensive explanation of the tax treatment of a Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning. Shareholders

are urged to consult their tax advisors with specific reference to their own tax situations, including their state, local, and foreign tax liabilities.

It is the policy of the Company each fiscal year to distribute substantially all of a Fund's net investment income (*i.e.*, generally, the income that it earns from dividends and interest on its investments, and any short-term capital gains, net of Fund expenses) and net capital gains (*i.e.*, the excess of a Fund's net long-term capital gains over its net short-term capital losses), if any, to its shareholders.

Dividend Reinvestment Service

The Funds will not make the DTC book-entry dividend reinvestment service available for use by beneficial owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of a Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares issued by a Fund at NAV. Distributions reinvested in additional shares of a Fund will nevertheless be taxable to beneficial owners acquiring such additional shares to the same extent as if such distributions had been received in cash.

Taxes – General

The discussions of the federal tax consequences in the Prospectus and this SAI are based on the Internal Revenue Code (the "Code") and the regulations issued under it, and court decisions and administrative interpretations, as in effect on the date of this SAI. Future legislative or administrative changes or court decisions may significantly alter the statements included herein, and any such changes or decisions may be retroactive. Each Fund intends to qualify as a regulated investment company under Subchapter M of Subtitle A, Chapter 1, of the Code. As such, each Fund generally will be exempt from federal income tax on its net investment income and realized capital gains that it distributes to shareholders. To qualify for treatment as a regulated investment company, each Fund must meet three important tests each year.

First, each Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to its business of investing in such stock, securities, or currencies, or net income derived from interests in qualified publicly traded partnerships.

Second, generally, at the close of each quarter of its taxable year, at least 50% of the value of each Fund's assets must consist of cash and cash items, U.S. government securities, securities of other regulated investment companies, and securities of other issuers (as to which that Fund has not invested more than 5% of the value of its total assets in securities of such issuer and as to which that Fund does not hold more than 10% of the outstanding voting securities of such issuer), and no more than 25% of the value of that Fund's total assets may be invested in the securities of (1) any one issuer (other than U.S. government securities and securities of other regulated investment companies), (2) two or more issuers that the Fund controls and that are engaged in the same or similar trades or businesses, or (3) one or more qualified publicly traded partnerships.

Third, each Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (net investment income and the excess of net short-term capital gain over net long-term capital loss) before taking into account any deduction for dividends paid, and 90% of its tax-exempt income, if any, for the year.

Each Fund intends to comply with these requirements. If a Fund were to fail to make sufficient distributions, it could be liable for corporate income tax and for excise tax in respect of the shortfall or, if the shortfall is large enough, a Fund could be disqualified as a regulated investment company. If for any taxable year a Fund were not to qualify as a regulated investment company, all its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders. In that event, taxable shareholders would recognize dividend income on distributions to the extent of a Fund's current and accumulated earnings and profits, and corporate shareholders could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on regulated investment companies that fail to distribute each year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). Each Fund intends to make sufficient distributions or deemed distributions each year to avoid liability for this excise tax.

Loss Carryforwards

For federal income tax purposes, each Fund is generally permitted to carry forward a net capital loss in any year to offset its own capital gains, if any, during subsequent years.

Taxation of Certain Investments

The tax principles applicable to transactions in financial instruments, such as futures contracts and options, that may be engaged in by a Fund, and investments in passive foreign investment companies (“PFICs”), are complex and, in some cases, uncertain. Such transactions and investments may cause a Fund to recognize taxable income prior to the receipt of cash, thereby requiring a Fund to liquidate other positions, or to borrow money, so as to make sufficient distributions to shareholders to avoid corporate-level tax. Moreover, some or all of the taxable income recognized may be ordinary income or short-term capital gain, so that the distributions may be taxable to shareholders as ordinary income.

In addition, in the case of any shares of a PFIC in which a Fund invests, a Fund may be liable for corporate-level tax on any ultimate gain or distributions on the shares if a Fund fails to make an election to recognize income annually during the period of its ownership of the shares.

State and Local Taxes

Although each Fund expects to qualify as a regulated investment company and to be relieved of all or substantially all federal income taxes, depending upon the extent of its activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located or in which it is otherwise deemed to be conducting business, a Fund may be subject to the tax laws of such states or localities.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Subject to the general supervision of the Board, the Adviser is responsible for decisions to buy and sell securities for the Funds, the selection of brokers and dealers to effect the transactions, and the negotiation of brokerage commissions, if any. Purchases and sales of securities on a stock exchange are effected through brokers who charge a commission for their services. In the OTC market, securities are generally traded on a “net” basis, with dealers acting as principal for their own accounts without a stated commission, although the price of the security usually includes a profit to the dealer. In underwritten offerings, securities are purchased at a fixed price, which includes an amount of compensation to the underwriter, generally referred to as the underwriter’s concession or discount. Certain money market instruments may be purchased directly from an issuer, in which case no commission or discounts are paid.

The Adviser may serve as an investment adviser to other clients, including private investment companies, and the Adviser may in the future act as an investment adviser to other registered investment companies. It is the practice of the Adviser to cause purchase and sale transactions to be allocated among the Funds and others whose assets are managed by the Adviser in such manner as it deems equitable. In making such allocations, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment, the size of investment commitments generally held, and the opinions of the persons responsible for managing the Funds and the other client accounts. This procedure may, under certain circumstances, have an adverse effect on the Funds.

The policy of the Funds regarding purchases and sales of securities is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Funds’ policy is to pay commissions that are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Adviser believes that a requirement always to seek the lowest commission cost could impede effective management and preclude the Adviser from obtaining high-quality brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Adviser relies on its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage and research services received from the broker effecting the transaction.

In seeking to implement the Funds’ policies, the Adviser, through a brokerage or an outsourced trading desk, conducts trades on behalf of the Funds and effects transactions with brokers and dealers that it believes provide the most favorable prices and are capable of

providing efficient executions. The Adviser may place portfolio transactions with a broker or dealer that furnishes research and other services to the Adviser and may pay higher commissions to brokers in recognition of research provided (or direct the payment of commissions to such brokers). Such services may include, but are not limited to, any one or more of the following: (1) information as to the availability of securities for purchase or sale, (2) statistical or factual information or opinions pertaining to investments, (3) wire services, (4) and appraisals or evaluations of portfolio securities. The information and services received by the Adviser from brokers and dealers may be of benefit in the management of accounts of other clients and may not in all cases benefit the Company directly. While such services are useful and important in supplementing its own research and facilities, the Adviser believes the value of such services is not determinable and does not significantly reduce its expenses.

No brokerage transaction information is provided because the Funds had not commenced operations prior to the date of this SAI.

SECURITIES LENDING

U.S. Bank, N.A. serves as securities lending agent for the Funds and in that role administers the Funds' securities lending program pursuant to the terms of a Master Securities Lending Agreement entered into between the Funds and U.S. Bank, N.A.

As securities lending agent, U.S. Bank, N.A. is responsible for marketing to approved borrowers available securities from the Funds' portfolio. U.S. Bank, N.A. is responsible for the administration and management of the Funds' securities lending program, including the preparation and execution of a participant agreement with each borrower governing the terms and conditions of any securities loan, ensuring that securities loans are properly coordinated and documented with the Funds' custodian, ensuring that loaned securities are daily valued and that the corresponding required cash collateral of at least 102% of the current market value of the loaned securities is delivered by the borrower(s), using best efforts to obtain additional collateral on the next business day if the value of the collateral falls below the required amount, and arranging for the investment of cash collateral received from borrowers in accordance with the Funds' investment guidelines.

U.S. Bank, N.A. receives as compensation for its services a portion of the amount earned by the Funds for lending securities.

PROXY VOTING PROCEDURES

The Board has delegated the responsibility of voting proxies with respect to the portfolio securities purchased and/or held by the Funds ("portfolio proxies") to the Adviser, subject to the Board's continuing oversight.

Policies of the Adviser

The Adviser's proxy voting policy establishes minimum standards for the exercise of proxy voting authority by the Adviser. The Adviser's proxy voting policies and procedures are set forth in Appendix B.

Each Fund may invest its assets in debt securities, which generally do not issue proxies. However, a Fund may also invest in other types of securities that may issue proxies.

More Information

The Company is required to disclose annually the Funds' complete proxy voting record on Form N-PX. The Funds' proxy voting record for the most recent 12-month period ended June 30th will be available upon request by calling 1-800-617-0004 or by writing to the Funds c/o U.S. Bank Global Fund Services, PO Box 701, Milwaukee, Wisconsin 53201-0701. The Funds' Form N-PX will also be available on the SEC's website at www.sec.gov.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Adviser and/or its affiliates, at their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with a Fund, its service providers or their respective affiliates, as incentives to help market and promote a Fund and/or in recognition of its distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to a Fund, the Distributor or shareholders of a Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing a Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about a Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in a Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

ADDITIONAL INFORMATION CONCERNING COMPANY SHARES

The Company has authorized capital of 100 billion shares of common stock at a par value of \$0.001 per share. Currently, approximately 90.023 billion shares have been classified into 211 classes. However, the Company only has approximately 56 active share classes that have begun investment operations. Under the Company's charter, the Board has the power to classify and reclassify any unissued shares of common stock from time to time.

Each share that represents an interest in each Fund has an equal proportionate interest in the assets belonging to that Fund with each other share that represents an interest in that Fund, even where a share has a different class designation than another share representing an interest in that Fund. Shares of the Company do not have preemptive or conversion rights. When issued for payment as described in the Prospectus, shares of the Company will be fully paid and non-assessable.

The Company does not currently intend to hold annual meetings of shareholders except as required by the 1940 Act or other applicable law. The Company's amended By-Laws provide that shareholders owning at least ten percent of the outstanding shares of all classes of Common Stock of the Company have the right to call for a meeting of shareholders to consider the removal of one or more directors. To the extent required by law, the Company will assist in shareholder communication in such matters.

Holders of shares of each class of the Company will vote in the aggregate on all matters, except where otherwise required by law. Further, shareholders of the Company will vote in the aggregate and not by portfolio except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interests of the shareholders of a particular portfolio or class of shares. Rule 18f-2 under the 1940 Act provides that any matter required to be submitted by the provisions of such Act or applicable state law, or otherwise, to the holders of the outstanding voting securities of an investment company such as the Company shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding voting securities of each portfolio affected by the matter. Rule 18f-2 further provides that a portfolio shall be deemed to be affected by a matter unless it is clear that the interests of each portfolio in the matter are identical or that the matter does not affect any interest of the portfolio. Under Rule 18f-2 the approval of an investment advisory agreement or distribution agreement or any change in a fundamental investment objective or fundamental investment policy would be effectively acted upon with respect to a portfolio only if approved by the holders of a majority of the outstanding voting securities of such portfolio. However, the Rule 18f-2 also provides that the ratification of the selection of independent public accountants and the election of directors are not subject to the separate voting requirements and may be effectively acted upon by shareholders of an investment company voting without regard to a portfolio. Shareholders of the Company are entitled to one vote for each full share held (irrespective of class or portfolio) and fractional votes for fractional shares held. Voting rights are not cumulative and, accordingly, the holders of more than 50% of the aggregate shares of common stock of the Company may elect all of the Directors.

Notwithstanding any provision of Maryland law requiring a greater vote of shares of the Company's common stock (or of any class voting as a class) in connection with any corporate action, unless otherwise provided by law (for example by Rule 18f-2 discussed above), or by the Company's Articles of Incorporation and By-Laws, the Company may take or authorize such action upon the favorable vote of the holders of more than 50% of all of the outstanding shares of Common Stock voting without regard to class (or portfolio).

GENERAL INFORMATION

Anti-Money Laundering Program

The Funds have established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Funds' Program provides for the development of internal practices, procedures, and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that certain of its service providers have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, and conducting a complete and thorough review of all new account applications. The Fund will not transact business with any person or legal entity and beneficial owner, if applicable, whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., 1350 Euclid Ave., Suite 800, Cleveland, Ohio 44115, is the independent registered public accounting firm of the Funds. The independent registered public accounting firm is responsible for conducting the annual audit of the Funds' financial statements. The selection of the independent registered public accounting firm is approved annually by the Board.

Transfer Agent

Fund Services, 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Funds' transfer agent and dividend disbursing agent.

Custodian

U.S. Bank, N.A., 1555 North Rivercenter Drive, Suite 302, Milwaukee, WI 53212, serves as custodian (the "Custodian") of the Funds' assets and is responsible for maintaining custody of the Funds' cash and investments and retaining sub-custodians, including in connection with the custody of foreign securities. Cash held by the Custodian, the amount of which may at times be substantial, is insured by the Federal Deposit Insurance Corporation up to the amount of available insurance coverage limits. The Custodian and Fund Services are affiliates.

Administrator

Fund Services, 615 East Michigan Street, Milwaukee, WI 53202, serves as the administrator (the "Administrator") and provides various administrative and accounting services necessary for the operations of the Funds. Services provided by the Administrator include facilitating general Fund management; monitoring Fund compliance with federal and state regulations; supervising the maintenance of the Funds' general ledger, the preparation of the Funds' financial statements, the determination of NAV, and the payment of dividends and other distributions to shareholders; and preparing specified financial, tax, and other reports. The Custodian and the Administrator are affiliates.

No administration fee information is provided because the Funds had not commenced operations prior to the date of this SAI.

Legal Counsel

Faegre Drinker Biddle & Reath LLP, One Logan Square, Suite 2000, Philadelphia, Pennsylvania 19103-6996, serves as counsel to the Company.

Registration Statement

This SAI and the Prospectus do not contain all of the information set forth in the Registration Statement the Company has filed with the SEC. The complete Registration Statement may be obtained from the SEC upon payment of the fee prescribed by SEC rules and regulations. A text-only version of the Registration Statement is available on the SEC's website, www.sec.gov.

FINANCIAL STATEMENTS

As the Funds had not commenced operations prior to the date of this SAI, there are no annual financial statements available at this time. Shareholders of the Funds will be informed of the Funds' progress through periodic reports when those reports become available. Financial statements certified by the independent registered public accounting firm will be submitted to shareholders at least annually.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

An *S&P Global Ratings* short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” - A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” - A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” - A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” - A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” - A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” - A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” – This indicates that a rating has not been assigned or is no longer assigned.

Moody’s Investors Service (“Moody’s”) short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

“P-1” - Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

“P-2” - Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

“P-3” - Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

“NP” - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

“NR” - Is assigned to an unrated issuer.

Fitch, Inc. / Fitch Ratings Ltd. (“Fitch”) short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention.¹ Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

¹ A long-term rating can also be used to rate an issue with short maturity.

“F1” - Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

“F2” - Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

“F3” - Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” - Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” - Securities possess high short-term default risk. Default is a real possibility.

“RD” - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Plus (+) or minus (-) - The “F1” rating may be modified by the addition of a plus (+) or minus (-) sign to show the relative status within that major rating category.

“NR” - Is assigned to an unrated issue of a rated issuer.

The **DBRS[®] Morningstar Ratings Limited (“DBRS Morningstar”)** short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The R-1 and R-2 rating categories are further denoted by the sub-categories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS Morningstar for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” - Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” - Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” - Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” - Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” - Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” - Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” - Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” - Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” - Short-term debt rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Credit Ratings

The following summarizes the ratings used by *S&P Global Ratings* for long-term issues:

“AAA” - An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” - An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” - An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” - An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” - Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” - An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” - An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” - An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” - An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” - An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” - An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Plus (+) or minus (-) - The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” - This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

Moody’s long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by *Moody’s* for long-term debt:

“Aaa” - Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” - Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” - Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” - Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” - Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” - Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” - Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” - Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” - Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

“NR” - Is assigned to unrated obligations.

The following summarizes long-term ratings used by *Fitch*:

“AAA” - Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” - Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” - Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” - Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” - Securities considered to be speculative. “BB” ratings indicate that there is an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” - Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present.

“CCC” - A “CCC” rating indicates that substantial credit risk is present.

“CC” - A “CC” rating indicates very high levels of credit risk.

“C” - A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings but are instead rated in the “CCC” to “C” rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

“NR” - Is assigned to an unrated issue of a rated issuer.

The *DBRS Morningstar* long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS Morningstar for long-term debt:

“AAA” - Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” - Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” - Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” - Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” - Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” - Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” - Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” - A security rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

An *S&P Global Ratings* U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” - A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” - A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” - A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” - This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less. Under certain circumstances, Moody’s uses the MIG scale for bond anticipation notes with maturities of up to five years.

MIG Scale

“MIG-1” - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” - Is assigned to an unrated obligation.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned. The components are a long-term rating and a short-term demand obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interests payments. The short-term demand obligation rating addresses the ability of the issuer or the liquidity provider to make payments associated with the purchase-price-upon demand feature (“demand feature”) of the VRDO. The short-term demand obligation rating uses the VMIG scale. VMIG ratings with liquidity support use as an input the short-term Counterparty Risk Assessment of the support provider, or the long-term rating of the underlying obligor in the absence of third party liquidity support. Transitions of VMIG ratings of demand obligations with conditional liquidity support differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG short-term demand obligation rating if the frequency of the demand feature is less than every three years. If the frequency of the demand feature is less than three years but the purchase price is payable only with remarketing proceeds, the short-term demand obligation rating is “NR”.

“VMIG-1” - This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-2” - This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-3” - This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

“NR” - Is assigned to an unrated obligation.

About Credit Ratings

An **S&P Global Ratings** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on **Moody’s** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch’s credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer default ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue level ratings are also assigned, often include an expectation of recovery and may be notched above or below the issuer level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

DBRS Morningstar offers independent, transparent, and innovative credit analysis to the market. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an issuer, rated entity, security and/or obligation based on DBRS Morningstar’s quantitative and qualitative analysis in accordance with applicable methodologies and criteria. They are meant to provide opinions on relative measures of risk and are not based on expectations of, or meant to predict, any specific default probability. Credit ratings are not statements of fact. DBRS Morningstar issues credit ratings using one or more categories, such as public, private, provisional, final(ized), solicited, or unsolicited. From time to time, credit ratings may also be subject to trends, placed under review, or discontinued. DBRS Morningstar credit ratings are determined by credit rating committees.

APPENDIX B

Genoa Asset Management (“GAM”) may vote proxies for certain advisory clients if that responsibility is specifically accepted by GAM in the advisory agreement between GAM and the client. Regardless, a client always has the right to vote their own proxies. A client can exercise this right by instructing GAM in writing to not vote proxies in the client’s account. In addition, where GAM has proxy voting authority but a client desires to direct GAM on how to vote a particular proxy, clients should contact GAM at the address below.

If the client agreement is entered into by a trustee or other fiduciary on behalf of an employee retirement income plan subject to the Employee Retirement Income Security Act (“ERISA”), including a person meeting the definition of “fiduciary” under ERISA, the trustee or other fiduciary generally retains the right and obligation to vote proxies. In such cases, the Adviser is generally precluded from voting proxies for the plan.

Our proxy voting procedures provide that we vote proxies in our clients’ interests, and that if we identify a material conflict of interest between us and the client, we will vote based upon the recommendation of an independent third party. In certain circumstances, in accordance with an investment advisory contract, or other written directive, or if we have determined that it is in the client’s best interest, we may refrain from voting proxies.

Upon written request, a client will be provided with our proxy voting policies and procedures. Clients may also request, in writing, copies of records regarding how we voted their securities. Written requests must be addressed to: Genoa Asset Management LLC, Attn: Chief Compliance Officer, 119 East Court St, Cincinnati, OH 45202.
